2 General Terms & conditions

2.1 Legal basis

For the ordinary use of the airport by aircraft, the Airport Authority shall cash charges in accordance with section 3 and 5 of this document. For use of the airport that exceeds the ordinary, the Airport Authority shall levy special charges in accordance with section 4 of this document. **Please note that section 5 of this document "Aerodrome charges" is an adapted excerpt of the document "LSZA - LUGANO AIRPORT - Aerodrome charges" published in the AIP Switzerland GEN 4.1 which remains the official document for all airport charges in case of any dispute. This adapted excerpt has been made available to the customer only for quick reference and Lugano Airport SA is not responsible for any inaccuracy, omission or inconsistency.**

2.2 Charges

The AP charges include:

- a) mass-related LDG charge
- b) mass-related noise surcharge on LDG charge
- c) approach charge (Skyguide) see ANNEX 2: Approach charges for Category II airports
- d) EM charge
- e) passenger charge
- f) parking charge
- g) cargo charge
- h) operating time surcharge
- i) fuel and lubricant prices
- j) ground handling charge - basic handling
- k) charges for particular services

Special services

The Airport Authority is entitled to debit extra charges for special services not specifically mentioned in these regulations.

2.3 Services by third parties

The Airport Authority reserves the right to ask for contributions from firms and companies operating at the airport or offering services to its users.

2.4 Liability for payment of charges

Unless provided otherwise, the charges shall be paid as follows:

- in case of scheduled or non-scheduled commercial flights, by the company that actually carries out the flight ("actual carrier")
- in case of non-commercial flights, by the operator of the aircraft

An aircraft operator is defined to be the party who has the actual and permanent power of control over the aircraft and who uses it or permits it to be used at its expenses.

Several operators of the same aircraft shall be jointly and severally liable for the charges; in case the operator is not also the owner of the aircraft, both the operator and the owner shall be jointly and severally liable for the charges.

2.5 Exemptions

The following cases are exempted from LDG, noise, approach, passenger and parking charges:

- operators of Swiss and foreign State ACFT provided that the ACFT is carrying the Head of State's government officials on a State visit
- search and police FLTs
- rescue and humanitarian FLTs
- ACFT participating in special demonstrations which are allowed by Lugano AP Authority

Obligation of data delivery

When claiming a reason for exemption according to Art. 2.6, all the necessary elements for decision have to be submitted to the Airport Authority.

2.6 Terms of payment of the charges

The airport charges must be paid prior to take-off at the latest; the Airport Authority is, however, entitled to demand payment at any time after the aircraft has landed.

The Airport Authority may invoice the charges to regular airport users monthly, provided they have their domicile or head office in Switzerland and can furnish valid financial guarantees.

The payment shall be settled within 30 days of the date of the invoice, unless other agreements have been made.

2.7 Currency

The charges are debited in Swiss francs (CHF).

2.8 VAT

The charge rates do not include value-added tax (VAT). All charges contained in this document are subject to VAT according to Swiss law. We would like to inform all our commercial operators, that from 01.01.2019, the VAT (Value Added Tax) will be exempted for supplies such as Fuel and extra handling services, only after production of an official document from the country of origin. Together with the AOC, this supplementary document declares that the company has the permission of its country to be exempted from VAT charge.

2.9 Collection

The Airport Authority may delegate an authorised dispatch office to cash the charges.

3 Basic Handling Tariff

3.1 Obligation

The operator of a commercial or private traffic aircraft over 3000 kg MTOM is due to pay a charge for the services rendered by Lugano Airport SA or Handling Agent for every rotation (one arrival and one departure or vice versa).

Prior notification is requested by sending the GA Handling Booking Form to gahandling@luganoairport.ch providing valid credit card details. The form is available online or on request.

3.2 Rates

5 Aerodrome charges

5.1 Landing charges (based on MTOM)

5.1.1 Obligation

For each landing, there shall be a charge payable in accordance with the Maximum Take-Off Mass of the aircraft. Missed approaches, during which the aircraft may or may not touch the ground, shall also be considered as landings unless the approach was required for safety reasons or performed at or above the circuit altitude.

5.1.2 Basis of calculation

The Maximum Take-Off Mass shall correspond to the information contained in the aircraft's Aircraft Flight Manual.

5.1.3 Charge rates

59	from 58001 to 59000	764.00
60	from 59001 to 60000	777.00

5.1.4 Charge reduction

The landing charge applied in accordance with Art. 5.11 and 5.1.3 is reduced by 33,33% (up to class 5 by 50%) if the aircraft, directly prior to the landing which is subject of this charge, took off from another Swiss airport (Bâle-Mulhouse included). The same charge reduction is applicable to local flights.

5.2 Noise surcharge on landing charge

5.2.1 Obligation

For each landing, there shall be a surcharge calculated on the landing charge due, payable in accordance with the noise level of the aircraft.

5.2.2 Noise classes for jet-engine aircraft

Jet-propelled aircraft shall be assigned to one of the noise classes I to V. The class assignment is published in GEN 4.1 - Appendix A.

5.2.3 Noise surcharge rates for jet-engine aircraft

The amount of the noise surcharge is:

Noise class	Noise charge CHF (excl. VAT)
I	1'000.--
II	600.--
III	400.--
IV	200.--
V	no surcharge

5.2.4 Noise classes for propeller-driven aircraft not exceeding 8618 Kg MTOM

The assignment of propeller-driven aircraft with a Maximum Take-Off Mass not exceeding 8618 kg into one to the noise classes A to D corresponds to the classification established by the Federal office for Civil Aviation. The decisive factor in this regard is the difference between the mandatory noise level limits in accordance with Annex 16 of the ICAO International Civil Aviation Organization and the measured noise level of the aircraft type corrected using the performance correction factor.

5.2.5 Assignments to the noise classes for propeller-driven aircraft not exceeding 8618 Kg MTOM

Aircrafts registered in Switzerland are assigned to the classes mentioned below according to the Swiss Aircraft Register. Aircraft registered abroad are classified according to Appendix B to the tariff regulations for public airports in Switzerland (Noise classification for propeller-driven aircraft without special sound-proofing, ref. GEN 4.1 - Appendix B).

5.2.6 Noise surcharge rates for propeller-driven aircraft not exceeding 8618 Kg MTOM

The amount of the noise surcharge per tonne or part thereof is:

Noise class	Noise charge CHF (excl. VAT)
A	10.--
B	6.--
C	3.--
D	no surcharge

5.2.7 Surcharge on Saturday, Sundays and local holidays

For landings on Saturday, Sundays and local holidays the noise surcharge is increased by 50% for all aircraft.

5.2.8 New and modified aircraft

In the event that a party liable to pay the charges claims to a more advantageous classification, it shall provide proof to the Airport Authority by submitting an appropriate documentation within 60 days from the date on which the claim is made.

5.2.9 Refund

If the proof required is provided on time, the Airport Authority shall refund the excess surcharge paid during the 60-day period.

5.3 Emission-related landing charges (with effect from 1st April 2010)

5.3.1 Principle

An emission related landing surcharge is applied to all aircraft equipped with a combustion engine and that are subject to a weight-based landing charge. The emission charge is based on the absolute emission characteristic of the engine as described in the FOCA Directive "Aircraft Engine Emission Charges in Switzerland" (Reference 33-05-27).

5.3.2 Aircraft with turbofan, turbojet or turboprop engines with emission data available to the FOCA

Aircrafts, equipped with turbofan, turbojet or turboprop engines that are:

- regulated under the ICAO Annex 16, Volume II, or
- not regulated, but have detailed emission data for the LTO cycle available to the FOCA,

are subject to the emission calculation as specified in ECAC Recommendation 27/4. Specifically, the following emission calculation formula applies:

$$\text{EmissionValueAircraft} = a * \#Engines * \sum_{LTO - modes} (60 * time * fuelflow * NOx_{Emissionfactor} \div 1000)$$

where:

a = 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is less than or equal to the current ICAO standard of 19.6 g/kN rated thrust or for unregulated engines.

a > 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is greater than the current ICAO standard.

a = HC Dp/Foo / 19.6, with a maximum value for 'a' of 4.0

LTO-Modes:

ICAO Certification LTO Modes:

Mode	Time (in minutes)
Take-off	0.7
Climbout	2.2

	Approach	4.0	
	Taxi/Idle	26.0	
# Engines:	number of engines fitted to the aircraft		
Time:	time in mode (see above)		(in minutes)
Fuelflow:	fuel flow per mode		(in kg/sec)
NOx Emission factor	Measured NOx-Emission factor per mode		(in g/kg fuel)

Emission factors and fuel flow for the four modes and the hydrocarbon certification value are taken from the ICAO engine database (regulated engines). Emissions data for unregulated engines are taken from the FOCA and FOI emissions database. The FOCA website provides additional information: www.bazl.admin.ch -> For Specialists -> Environment

5.3.3 Aircraft with piston engines, helicopter and aircraft with engines without emission data available to the FOCA

Aircraft, equipped with:

- piston engines
- rotary wing engines
- any other engine without emission data available to the FOCA

are also subject to an emission charge. Specifically, they are assigned an emission value derived from the following table 1 and depending on the type, performance and number of engines fitted to the aircraft.

Table 1: FOCA Aircraft Emission Value Matrix

# Eng.	Piston: Turbodiesel Microlight Ecolight	Piston: Conventional	Piston: Conventional	Piston: Conventional	Helicopter	Helicopter	Business-Jets	Business-Jets	Turbo-props
		up to 200 hp	200-400 hp	>400 hp	<1000 shp	>1000 shp	(<16 kN)	(>16 but <26.7 kN)

4	-	0.8	1.6	2	-	2.8	-	-	3.2

5.3.4 Emission tariff

The applicable tariff is CHF 3.40 per Emission Value Aircraft

5.4 Passenger charge

5.4.1 Obligation

Subject to Art. 5.4.2, a charge shall be payable for each passenger who is transported by an aircraft that takes off from the airport.

5.4.2 Passenger charge rates

Charges	Passenger	Security	Noise	PRM	Total charge
for general aviation traffic per passenger	CHF 19.00	-	CHF1.00	-	CHF20.00

5.4.3 Exemptions

No charge shall be levied in case of passengers on local flights.

5.5 Parking charge

5.5.1 Obligation

A parking charge shall be levied for aircraft's parking between landing and take-off. This charge shall be in accordance with the Maximum Take-Off Mass and the sector occupied (grass or hard surface) after a free parking time has elapsed.

5.5.2 Basis of calculation

Basis of calculation of the charges is:

- Maximum Take-Off Mass (according to art. 5.1.2)
- occupied sector (grass or hard surface)
- duration of the parking period

Partial tons, days and hours shall be calculated as full tons, days and hours.

5.5.3 Parking rates

5.5.4 Assignment of the parking positions

The Airport Authority assigns the parking position based on an assumed duration, which must be communicated in advance, and on availability of space.

The Airport Authority may determine a maximum period for the parking.

The Airport Authority may delegate the management of the parking to third parties.

5.6 Fuel and lubricant prices

5.6.1 Charges

The Airport Authority does not apply any charges on fuel, as it is the supplier. The official prices are published separately on the Lugano Airport website: www.luganoairport.ch and adapted monthly to the variations of the purchasing prices.

6 Surcharge outside Airport operating hours

6.1 Obligation

For each movement (landing or take-off) a special charge is levied according to the operating time
