5.3.1 Principle

An emission related landing surcharge is applied to all aircraft equipped with a combustion engine and that are subject to a weight-based landing charge. The emission charge is based on the absolute emission characteristic of the engine as described in the FOCA Directive “Aircraft Engine Emission Charges in Switzerland” (Reference 33-05-27).

5.3.2 Aircraft with turbofan, turbojet or turboprop engines with emission data available to the FOCA

Aircrafts, equipped with turbofan, turbojet or turboprop engines that are:

- regulated under the ICAO Annex 16, Volume II, or
- not regulated, but have detailed emission data for the LTO cycle available to the FOCA,

are subject to the emission calculation as specified in ECAC Recommendation 27/4. Specifically, the following emission calculation formula applies:

$$\text{EmissionValueAircraft} = a * \#Engines * \sum_{\text{LTO - modes}} (60 * \text{time} * \text{fuel flow} * \text{NOx Emission factor} \div 1000)$$

where:

a = 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is less than or equal to the current ICAO standard of 19.6 g/kN rated thrust or for unregulated engines.

a > 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is greater than the current ICAO standard.
a = HC Dp/Foo / 19.6, with a maximum value for ‘a’ of 4.0

LTO-Modes: ICAO Certification LTO Modes:

Mode	Time (in minutes)
Take-off	0.7
Climbout	2.2
Approach	4.0
Taxi/Idle	26.0

Engines: number of engines fitted to the aircraft
 Time: time in mode (see above) (in minutes)
 Fuel flow: fuel flow per mode (in kg/sec)
 NOx Emission factor: Measured NOx-Emission factor per mode (in g/kg fuel)

Emission factors and fuel flow for the four modes and the hydrocarbon certification value are taken from the ICAO engine database (regulated engines). Emissions data for unregulated engines are taken from the FOCA and FOI emissions database. The FOCA website provides additional information: www.bazl.admin.ch -> For Specialists -> Environment

5.3.3 AC with piston engines, helicopter and AC with engines without emission data available to the FOCA

Aircraft, equipped with:

- piston engines
- rotary wing engines
- any other engine without emission data available to the FOCA

are also subject to an emission charge. Specifically, they are assigned an emission value derived from the following table 1 and depending on the type, performance and number of engines fitted to the aircraft.

Table 1: FOCA Aircraft Emission Value Matrix

5.4 Passenger charge

5.4.1 Obligation

Subject to Art. 5.4.2, a charge shall be payable for each passenger who is transported by an aircraft that takes off from the airport.

5.4.2 Passenger charge rates

Charges	Passenger	Security	Noise	PRM	Total charge
General Aviation traffic passenger	CHF 19.00	-	CHF 1.00	-	CHF 20.00

5.4.3 Exemptions

No charge shall be levied in case of passengers on local flights.

5.5 Parking charge

5.5.1 Obligation

A parking charge shall be levied for aircraft's parking between landing and take-off. This charge shall be in accordance with the Maximum Take-Off Mass and the sector occupied (grass or hard surface) after a free parking time has elapsed.

5.5.2 Basis of calculation

Basis of calculation of the charges is:

- Maximum Take-Off Mass (according to art. 5.1.2)
- occupied sector (grass or hard surface)
- duration of the parking period

Partial tons, days and hours shall be calculated as full tons, days and hours.

5.5.4 Assignment of the parking positions

The Airport Authority assigns the parking position based on an assumed duration, which must be communicated in advance, and on availability of space. The Airport Authority may determine a maximum period for the parking. The Airport Authority may delegate the management of the parking to third parties.

5.6 Fuel and lubricant prices

5.6.1 Charges

The Airport Authority does not apply any charges on fuel, as it is the supplier. The official prices are published separately on the Lugano Airport website: www.luganoairport.ch and adapted monthly to the variations of the purchasing prices.

6 PPR Extension - Surcharges outside Airport operating hours

Extension out of normal operating hours on request with PPR minimum 48/h before ETD/ ETA

Extension are usually approved only for aircraft above 3T

Due to actual airport organization PPR will not be automatically granted

For morning extensions full charge applicable per hour

6.1 Obligation

Outside operating hours (landing or take-off) a special charge is levied calculated from the opening/closure of the airport.
